REPORTING REQUIREMENTS

THE DEPARTMENT OF HUMAN RESOURCES IS SUPPLYING REPORTS AND STATISTICS ON WELFARE REFORM TO FULFILL THE REQUIREMENTS OF SENATE BILL 104.

FROM SENATE BILL 104:

"[The department shall] publish an annual report and such interim reports as may be necessary. The annual report and such interim reports shall be provided to the Governor and members of the General Assembly and contain the following:

- A. The total TANF caseload count;
- B. Quarterly and annual TANF reports, in full, prepared for submission to the federal government;
- C. The percentage of the TANF caseload and the number of individuals given a hardship exemption from the lifetime limit on cash assistance and a categorization for such exemption;
- D. The number of individuals who received transportation assistance and the cost of such assistance;
- E. The number of individuals who received diversionary assistance in order to prevent their requiring TANF assistance and the categories of such diversionary assistance, and job acceptance and retention statistics;
- F. The number of individuals denied assistance due to a serious violent felony conviction;
- G. The number of mothers under 19 years of age who received assistance and their percentage of the total TANF caseload;
- H. Number of children receiving subsidized childcare and the total and average per recipient cost per child;
- I. Data on teen pregnancy prevention;
- J. The number of families sanctioned;
- K. The number of legal immigrants receiving TANF benefits by category of immigration status;
- L. The number of families no longer eligible because of time limits;
- M. Follow-up information on job retention and earnings; and
- N. An evaluation of the effect of Code Section 49-4-186 on the number of births to TANF recipient families.

The annotations required under this paragraph shall be provided on a county-by-county basis where feasible.

WELFARE REFORM IN GEORGIA: 2014–2024

Senate Bill 104

The enabling legislation for the Temporary Assistance for Needy Families (TANF) program in Georgia is Senate Bill 104, now known as Act 389. The major provisions are:

- Most recipients are limited to 48 months of TANF assistance.
- All adult TANF recipients and all eligible parents are required to participate in approved work activities.
- All adult TANF recipients are required to sign a personal responsibility plan that emphasizes personal responsibilities to better their lives.

Some of the required actions include:

- ensuring that minor children attend school
 - attending school conferences
 - attending family planning counseling
 - participating in substance abuse treatment, if needed
 - having children immunized, and
 - obtain prenatal care, if needed
- Teen parents are required to continue to live with a parent or responsible relative and must remain in school to obtain their GED or high school diploma.
 - Family cap measures were strengthened, so that TANF cash assistance does not increase for recipients who give birth to an additional child after receiving TANF for ten months.
 - Families who do not meet work or personal responsibility requirements could be sanctioned, with a reduction in or termination of benefits for three (3) months or 12 months, depending on the number of infractions.

The Personal Responsibility and Work Opportunity Reconciliation Act

In August 1996, the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) was enacted. PRWORA eliminated the Aid to Families with Dependent Children (AFDC) cash entitlement program and replaced it with the TANF block grant. PRWORA effectively ended welfare entitlement, replacing the AFDC program with the time limited TANF program. The four purposes of TANF are:

- Provide assistance to needy families so that children may be cared for in their own homes.
- Reduce welfare dependency by promoting job preparation, work, and marriage.
- Prevent teen pregnancies.
- Encourage the formation and maintenance of two-parent families.

PRWORA established mandatory work participation rates and enacted time limits on the receipt of TANF benefits. Moreover, PRWORA afforded states greater flexibility in the design and implementation of the TANF program and provided each state a block grant to fund its program. State Maintenance of Effort (MOE) spending levels were mandated so that states would maintain levels of spending consistent with previous spending for AFDC.

In the fall of 1996, Georgia submitted a state plan for administering the TANF program. Following a 45-day federal review period and a series of public hearings, the plan was accepted by the U.S. Department of Health and Human Services (HHS) and Georgia was approved to receive the TANF block grant. The first TANF checks were issued on January 1, 1997.

In past years, the most important aspect of the case manager's job was issuing welfare benefits. With the 1996 introduction of Work First, the emphasis shifted to helping case managers assist TANF recipients in maintaining employment, as well as seeking career advancement. Customers are expected to find employment, keep the job, and seek career advancement. The goal is family self-sufficiency, limiting the need for public assistance. As a result, TANF caseloads greatly declined.

Georgia made the necessary changes to be compliant with the Final Rule. The most significant change was new internal control guidelines, requiring major system changes.

The Growth of TANF in Georgia

October 2004: Georgia initiated a new service delivery strategy for TANF called TANF = WORK NOW. This strategy focused on 3 elements:

- Education - TANF participants were educated at the point of application on all the goals and requirements of the TANF program.
- Engagement - TANF participants with a work requirement were engaged in work activities within seven (7) days of the approval of their application.
- Monitoring - TANF participants were monitored consistently and frequently to ensure adherence to program requirements.

This concept yielded a significant decrease in the number of total TANF cases, particularly the number of adult mandatory cases.

April 2006: Georgia took TANF = WORK NOW a step further by focusing on values and beliefs that would assist in strengthening Georgia's families. New policies were implemented, and case managers were trained on the principles of case management. The values and beliefs that we espouse are:

- Welfare is not good enough for any family.
- Government cannot and should not take the place of family.
- Children are better off when responsible caretakers can provide for their families.
- There is dignity in work, whether with the hand or the head.
- Georgia urges responsible adult behavior and economic self-sufficiency to end dependency on government assistance.

- With proper preparation, support, and supervision, we can help our customers create a more secure employment future for themselves.

October 2006: Georgia recognized the need for additional transitional supports to assist participants with job retention and career advancement, thereby, launching the Work Support Program.

February 2008: Final Rule for the Reauthorization of TANF was released by the Administration for Children and Families (ACF) / HHS. This rule was based on changes required by the Deficit Reduction Act (DRA) of 2005. According to the DRA final document (45 CFR, Parts 261, 262, 263, and 265. pg. 6772), “The DRA reauthorized the TANF program through federal fiscal year (FFY) 2010 with a renewed focus on work, program integrity, and strengthening families through healthy marriage promotion and responsible fatherhood.”

The DRA retained most of the original welfare reform law. The key changes in the Final Rule were: (1) defined each of the 12 countable work activities, (2) defined the term “work eligible individual,” (3) clarified that a State may count only actual hours of participation, (4) recalibrated the caseload reduction credit by updating the base year from FFY 1995 to FFY 2005, (5) required each State to establish and maintain work participation verification procedures through a Work Verification Plan, (6) established a new penalty for failure to comply with work verification procedures, and (7) allows additional pro-family expenditures to count toward a State’s MOE requirement.

October 2010: The agency rolled out a new business process, Georgia Re-engineering Our Work (G.R.O.W.). The G.R.O.W. process established three functions that case managers focus on (1) interviewing applicants, (2) processing applications, and (3) finalizing applications. An applicant in North Georgia applying for benefits could be interviewed by a case manager in Middle Georgia. The application could then be transmitted to a case manager in West Georgia for processing and transmitted to another location for finalization or approval. After approval, the case was transferred back to the county where the applicant resided. The G.R.O.W. process symbolized the concept of doing more with less.

October 2011: The Georgia Department of Human Services (DHS) added a new process, Document Imaging System (DIS). The DIS gave public assistance customers the option to scan in documents from a home computer scanner, a scanning station in a public community center, such as the Community Action Agencies/Authorities (CAA’s), certain child support offices, or local Georgia Division of Family and Children’s Services (DFCS) offices. Customers who were employed and unable to report to a local DFCS office could renew their benefits online and scan the required supporting documents to an image repository where the case manager or other staff could access the documents.

October 2012: DFCS revisited the G.R.O.W. process to reevaluate its effectiveness. During the evaluation, it became evident that the work could not change, but the way the work was done could. Business Operations Planning (B.O.P.) was added. B.O.P. is: (1) the standardization of G.R.O.W. within each Region. All Regions would use the same procedures to complete a case from start to finish. (2) Self-service was the standardized lobby resource, (3) Document Imaging (DIS), (4) Telecommunications – Local Office call center model, and (5) Office of Financial Independence (OFI) Data Tool – Standardized data management. OFI Teams were formed to ensure standardization. The OFI Teams consisted of: (1) Customer Support, (2) Business Support, and (3) Eligibility Specialists. Our customer support staff supported all walk-in work and was the face

of DFCS. The business support staff scanned mail to DIS, answered general inquiries, registered, and initiated cases. The eligibility specialists keyed cases, interviewed applicants, finalized cases, and handled case maintenance. With these measures in place, we were striving to provide our customers with a timely and efficient outcome.

2013: To improve the overall service of the public assistance programs, Georgia focused on improving the process to provide convenient access, service accountability, and improve the customer experience. Georgia One was a combination of technology (DIS and COMPASS) and incorporated self-service options that allowed DFCS to provide Supplemental Nutritional Assistance Program (SNAP), TANF, Childcare and Parent Services (CAPS), and Medicaid recipients the opportunity to track and manage their case. This change helped us serve our customers more efficiently and effectively.

March 2015: To find the best way to serve its people, the State reached out to all public assistance programs to map current processes. Georgia began to find more effective ways to help provide eligibility services and improve customer service. Georgia Gateway, an integrated eligibility system, began to form. It would allow interested parties to research information about available public assistance programs online. Future enhancements will include online application and eligibility criteria for other participating public assistance programs such as SNAP, CAPS, Medicaid, Women, Infants, Children (WIC), and PeachCare for Kids (PCK). Georgia Gateway is being implemented concurrently with a new business model known as “One Caseworker, One Family”, which streamlines the case management process by assigning one caseworker from application to completion.

February 2017: Georgia Gateway, the multi-agency integrated eligibility system, debuted in Henry County. A phased rollout across the state culminated with Fulton and Dekalb counties joining in September 2017.

October 2018: Standardized Employment Services contracts, developed jointly by the state office and district staff, were put in place to simplify the delivery and monitoring of referred applicants and the activities of work-eligible individuals. Additional vendors were developed, along with a standardized invoicing system.

2020: The COVID-19 pandemic created the need to modernize TANF policies and procedures in 2020. Effective March 2020, mandatory work requirements were waived. However, those who were able and wished to continue their work activities remained supported. Also, eligibility verification requirements were lessened to remove potential hardships to those who were sheltering in place. For example, forms were mailed, but a signed copy was no longer required to be returned. Effective June 1, 2020 Temporary Assistance for Needy Families (TANF) became available via Georgia Gateway as an online application tool. Anyone may apply online Monday-Friday 5:00 am – midnight (excluding weekends and holidays).

- **Work Activities and Sanction Suspension:** Since work requirements were temporarily waived, all outstanding work sanctions were lifted effective April 2020. Failure to participate will not result in adverse action until work requirements resume as mandatory.
- **Extending Certification Periods on Renewals:** Reviews were also extended to assist families during the COVID pandemic. Families received a six-month extension on their annual

renewal deadlines. For example, renewals that were due in March (pre-COVID-19) were extended to September.

2021: COVID-19 procedures for the TANF program that began in SFY 2020 remained in place during SFY 2021. This included temporarily waived work requirements, a reduction in the forms requiring client signature (to reduce the need for hard paperwork circulation) and extended renewal periods.

In SFY21, work-eligible individuals were encouraged to participate in work activities and support services continued to be paid. Many individuals benefited by choosing job search as a supported activity. Those participants who found full-time employment qualified for work support payments of \$200 per month for up to 12 months, as well as continued support services. State law requires a TANF lifetime limit of 48 months, however, Georgia granted good cause extensions to ensure that families' assistance remained in place when they needed it the most.

TANF policy was also adapted to mirror the evolving policies for SNAP and Medicaid. Having similar policies between programs streamlines eligibility practices for staff and reduces the need to provide non-essential verification, saving time and energy for our families requesting assistance.

2022: In SFY 2022, the TANF program saw the end of the COVID-19 Procedures that began in SFY 2020. This included the end of the Waiver of TANF Work Requirements. All work eligible individuals were to be assessed for work readiness and assigned an appropriate activity beginning July 2022.

In April 2022, Georgia also distributed their Pandemic Emergency Assistance Funds (PEAF) established by the American Rescue Plan Act of 2021. P-TANF provided a one-time payment of \$775 per individual who had correctly received a TANF benefit between April 1, 2020, to September 30, 2021. This payment was to assist families with any financial needs arising from the pandemic. The remaining funds from the issuance of P-TANF were issued as an employment bonus to work eligible individuals who were employed when TANF work requirements resumed or gained employment in the month of July 2022 and the earned income caused TANF ineligibility effective August 1, 2022. The PEAFF Employment Bonus amount was \$232.29 per family.

2023: With the signing into law of HB129 in SFY 2023, Georgia began expanding TANF eligibility to consider the needs of a pregnant woman. As of July 1, 2023, the TANF grant amount is now based on the number of eligible members and the number of verified fetuses. A pregnant woman or pregnant minor must meet all TANF eligibility requirements and are considered for work requirements with or without dependent children.

Additionally, HB129 brought an end to the provision for Family Cap in the TANF program. All TANF cases with a family cap child were updated prior to July 1 to remove the family cap provision which allowed some families to receive an increase in their TANF benefit for July ongoing.

2024: In SFY 2024, Georgia qualified for a re-allotment of PTANF benefits because all initial PTANF funds were exhausted. This re-allotment of benefits was known as P-TANF RRR and it provided a one-time payment for individuals in a Relative Raising Relative (RRR) assistance unit who were eligible for and approved for TANF cash assistance by August 31, 2023. P-TANF RRR distributions occurred on March 15, 2024, with 5,647 eligible children receiving \$450.61 each.

TANF Adult CASELOADS

SFY 2014 thru SFY 2024

TANF Adult Caseloads

As we continue our mission to help TANF recipients attain self-sufficiency, our adult TANF caseload is decreasing. The TANF Adult Caseload has dropped from 2,917 in 2014 to 701 in 2024. The decrease is 2,216 cases within a 10-year period.

Collaborative Efforts

To assist Georgia's TANF recipients fulfill the requirements of Act 389 and attain self-sufficiency, it was necessary that we collaborate with other public service agencies and entities. To start, we formed partnerships with Georgia Department of Labor (GDOL) and the Technical College System of Georgia (TCSG) to develop a job-ready workforce. Each agency committed to providing specific services to TANF recipients, while DHS provided case management and support services. TCSG was the primary source for job training and GDOL focused on job development and placement.

The services provided through these partnerships have contributed greatly to the families receiving TANF. The recipients utilized the job training, job development and job placement resources from our partners to gain or refresh their skills; thus, becoming more marketable. The services also helped some find better jobs and leave the TANF program.

TANF CASELOADS

SFY 2014 thru SFY 2024

In SFY 2014, Georgia had 14,600 TANF cases. The current total number of TANF cases in Georgia for SFY 2024 is 6,382. Georgia has reduced its caseload by approximately 50% in ten years.

Transportation

Transportation expenditures greatly increased with the implementation of TANF and subsequently decreased as the number of TANF cases declined. DFCS provides direct payments or public transportation cards to applicants, recipients, and those receiving transitional support. Beginning SFY 2000, DFCS collaborated with the Georgia Office of Facilities and Support Services to expand the Consolidated Transportation System. TANF funds invested in this initiative have increased from \$345,000 in SFY 2000 to \$3,200,000 in SFY 2018. Transportation services through DHS' Consolidated Transportation System ended in 2019 with a reduction in TANF cases. In SFY 2024, TANF funds paid directly to applicants and recipients totaled \$19,532.00.

Employment Intervention Services (EIS)

EIS is available to TANF applicants who have full time employment but is temporarily on unpaid leave due to a temporary illness and is scheduled to return to work within four (4) months, and the AU meets the gross income ceiling (GIC) test.

Work Support Payments

In addition to partnerships with other agencies, the availability of work support payments is critical to the success of TANF self-sufficiency efforts. To secure and maintain employment, many families require assistance with transportation, childcare, and medical expenses as well as assistance in obtaining child support.

WSP and Transitional Support Services (TSS) will be provided for applicants and participants who find employment and become ineligible for ongoing TANF or those who choose to close their TANF case once the benefit is reduced. Both services will be provided for up to twelve (12) months.

Comparison of Cash Assistance and Childcare Expenditures

in Millions of Dollars

SFY 2014 thru SFY 2024

Number of Children in Childcare

(Based on payments processed)

State Fiscal Year 2014 – 2024

Childcare

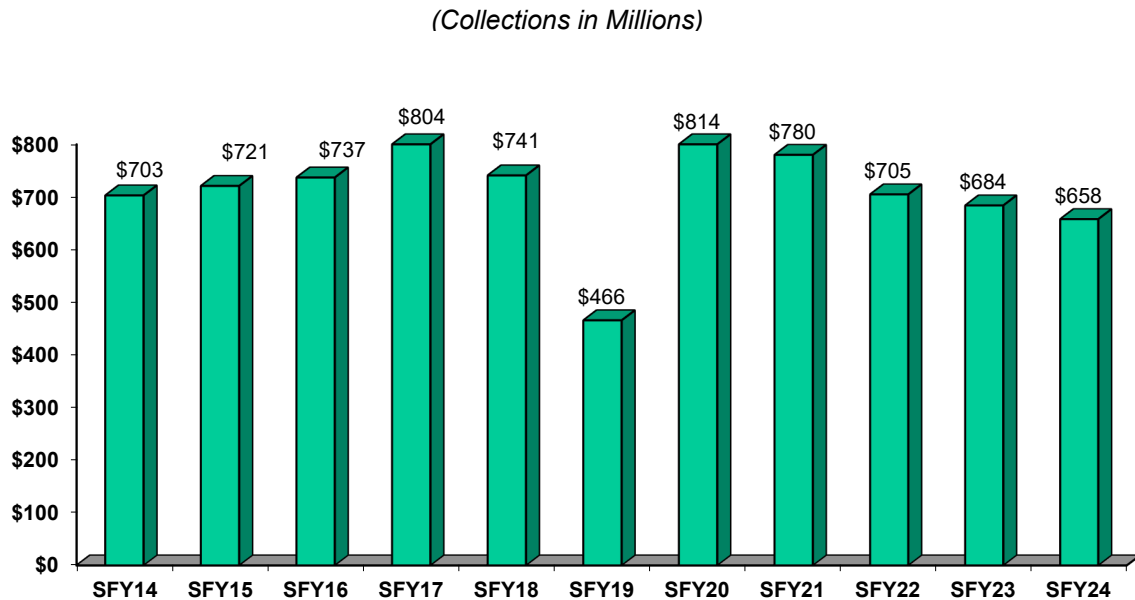

Affordable, quality childcare is essential to the success of individuals obtaining and maintaining employment. The average number of children in childcare from month to month decreased from 78,289 children in SFY 2010 to 33,087 in SFY 2019. In addition, expenditures in the program decreased from \$212M in SFY 2010 to \$48M in SFY 2024. Childcare assistance is administered by Georgia Department of Early Care and Learning.

Medicaid

Many TANF recipients beginning first-time employment were either unable to afford the medical insurance made available to them by their employers or found that few employers offered the option of medical insurance. The combination of Low-Income Medicaid (LIM), Transitional Medical Assistance (TMA), and Right from the Start Medicaid (RSM) or PeachCare for Kids (PCK) provided and continues to provide this necessary coverage. The 12-month continuation of Medicaid in the

form of TMA provides necessary medical coverage for families who become ineligible for LIM because of new or increased earned income. Once TMA ends, the children of most families are eligible for additional coverage through RSM or PCK. As of June of 2024, 958,935 Georgia families received Medical Assistance.

Increasing Success in Collecting Child Support

Child Support

Insufficient child support prevents many single parents from attaining economic self-sufficiency. Increased collections by the Division of Child Support Services (DCSS) program are helping families receive more of the child support owed to them. There was a drop in the amount of child support collected from SFY 2007 (\$651M) to SFY 2008 (\$566M). The collections rebounded in SFY 2009 (\$595M), in 2010 (\$600M), in 2011 (\$708M) and then slightly decreased in 2012 to (\$692M) and again in 2013 (\$682M). Child Support collections rebounded in 2014 to (\$703M), in 2015 to (\$721M), 2016 (\$737M), and 2017 (\$744M). Collections took a slight dip in SFY 2018 to (\$741M). In SFY 2019, there was a 37.1% decrease in collections. The total collected in SFY 2019 was \$466M. The total collected in SFY 2024 was \$658M.

An additional support service provided by DCSS is the Georgia Fatherhood Program, a statewide outreach program designed to increase the collection of child support from non-custodial parents with education and employment barriers. Job training is provided to assist non-custodial parents in securing employment that will enable them to pay child support and provide for their children.

Collaborative Work Supports

The future of welfare reform in Georgia includes a continuing focus on moving families to economic independence, through stable employment. Most recipients who remain on TANF fall into three

main categories. The largest population is comprised of children who receive TANF in “child-only” cases, which a non-parent relative caring for the children and is not included in the TANF grant. These families are not subject to time limits or work requirements. The second category consists of recipients who are enrolled in an activity and participating at the required federally, mandated level for adults receiving TANF for themselves and their children. The third and most challenging category consists of recipients who are dealing with multiple barriers to self-sufficiency. Some of these barriers include substance abuse, illiteracy, disabilities, and domestic violence issues. The following initiatives continue to assist these recipients in attaining self-sufficiency:

- The Georgia Department of Behavioral Health & Developmental Disabilities (DBHDD) and Addictive Diseases provide substance abuse counseling and treatment through outpatient and residential facilities. Treatment for clients who have been diagnosed with mental impairment and mental retardation is also provided.
- The Georgia Vocational Rehabilitation Agency (GVRA) provides disability assessments for recipients who allege a disability that impedes their ability to work. GVRA also places recipients in appropriate programs based on assessment outcomes and makes recommendations that assist DFCS in planning services to help recipients overcome barriers to employment.
- The TCSG provides expanded adult literacy services and vocational classes.
- Domestic violence issues have been emphasized through various measures. Local shelters provide assessments for individuals claiming domestic violence as a barrier to becoming self-sufficient. Waivers from certain program requirements may be granted based on assessment outcomes. Training is provided for DFCS staff. Brochures and posters are distributed throughout local areas to increase awareness of available services.
- In FY2018, Georgia partnered with the City of Atlanta and U.S. Department of Housing and Urban Development (HUD) to form the TANF Rapid Rehousing Program. Using a braided funding model, this partnership rapidly rehoused 100 homeless families living in location unsuitable for human habitation. Supportive services, including childcare navigation, employment assistance, and housing resources were provided. In FY2019 and ongoing, funds were added to house up to 150 TANF eligible families annually.

Lifetime Limits

In Georgia, the receipt of TANF is limited to 48 months in a lifetime for an assistance unit. Beginning in January 1997, each month of TANF receipt counts toward the 48-month lifetime limit. The federal lifetime limit is 60 months. An assistance unit that is subject to the lifetime limit may have the limit waived if it is determined that the assistance unit meets certain hardship criteria. TANF months received by a recipient from another State is subject to be counted in the lifetime time limits.

Hardship waivers

Some families will require additional time to prepare for work and some may never be fully self-sufficient. For these families, Georgia has established a hardship waiver policy that is approved on a case-by-case basis. The waiver of the lifetime limit allows for temporary extensions of TANF to families experiencing additional barriers.

The hardship waiver policy was revised in April 2006. There were three hardship criteria used by case managers to evaluate each family's situation.

Additional hardship criteria were added in February 2019 for individuals participating in substance abuse programs, physically and mentally unable to work, and caring for disabled household members.

1. The AU meets the domestic violence criteria.
2. The AU has an active child protective services case and the circumstances necessitating the CPS case create a barrier to the AU's attainment of self-sufficiency.
3. Participates in substance abuse program.
4. Physical/Mental incapacity to work.
5. Caring for a disabled household member
6. The disability of the grantee relative, other eligible adult or a household member is a barrier to employment for the grantee relative or other eligible adults.

Other forms of support like Food Stamps, Medical Assistance, shelter, and utility assistance, are available to families that do not meet any of the hardship criteria.

Georgia's TANF caseload totaled 50,996 cases in December 2000 when the first 1,446 families reached the 48-month time limit. Of those families, 1,094 met a hardship criterion and were eligible for extended TANF benefits through hardship waivers. Since December 2000, the number of families reaching the 48-month time limit has consistently decreased.

In December 2005, another milestone in the TANF program was reached. There were 311 Georgia TANF recipients that reached the federally imposed 60-month TANF lifetime limit. Of the 311 recipients, 280 continued to be eligible under a hardship extension. As with the 48-month time limit, the number of families reaching the 60-month federal lifetime limit has decreased. In June 2002, there were 1,566 families receiving a hardship extension, but in June 2005 there were only 230 families receiving extensions. In June of 2006, 49 families received an extension, and in June 2009, Georgia had only 18 families who received a hardship extension. In June 2010, there were only two households that received a hardship extension. In 2012, there was one household receiving a hardship extension. In 2013, there were no households receiving a hardship extension. As of 2024, there were 2 households receiving a hardship extension.

Adolescent Health and Youth Development Program

Federal Temporary Assistance for Needy Families (TANF)

Chronic Disease Prevention Section, Medical and Clinical Service Division,
Georgia Department of Public Health

Fiscal Year 2024 Summary Report

Reporting Period:

July 1, 2023 - June 30, 2024

This report was compiled by The Burruss Institute at Kennesaw State University the Program Evaluator consultant, and reviewed by Phillip Oliver, Adolescent Health and Youth Development Program Manager; Sarah Wilkinson, Deputy Director, Office of Child and Adolescent Risk Reduction Strategies; Emma Bicego, Senior Deputy Director, Office of Health Sciences and Evaluation, and Kia Toodle, Director, Chronic Disease Prevention Section (CDPS). The report uses data compiled and reviewed by the Burruss Institute at Kennesaw State University and CDPS staff at the Georgia Department of Public Health.

Reporting on Fiscal Year 2024 Program Goals

Implementation of Evidence-based Curricula to reduce risk of pregnancy and HIV/STIs contraction.

Public health districts exceeded the stipulated annual goal of reaching 840 youth by reaching a total of 2,948 youth.

Providing youth development opportunities to cover adolescent health topics and skill sets.

A total of 256 youth development opportunities were implemented during the fiscal year, exceeding the annual goal of 60.

Instituting public awareness events about adolescent health-related issues.

A total of 326 public awareness events were implemented throughout the public health districts, involving 25,591 attendees and exceeding the annual goal of 120 events.

Providing training opportunities for youth-serving professionals, parents, community members, or youth.

A total of 2,253 youth-serving professionals were provided with training opportunities exceeding the annual goal of reaching 600 participants.

Adopt strategies to achieve policy, systems, and environmental (PSE) change related to adolescent health.

A total of 22 policy, systems, and environmental changes were adopted, involving 76 collaborations/meetings and exceeding the target of one annual PSE change per district.

Evaluation of Program Activities

During Fiscal Year 2024, data collected included Deliverables 1, 3, and 4. The following program deliverables were evaluated to assess the impact of program activities:

- Implementation of Evidence-based Curricula to reduce risk of pregnancy and HIV/STIs contraction.
- Instituting public awareness events about adolescent health-related issues.
- Providing training opportunities for youth-serving professionals, parents, community members, or youth.

Evaluation of the Implementation of Evidence-based Curricula

Demographics of program participants:

The race, ethnicity, and gender of students participating in evidence-based curriculum in FY24 (N = 2,948) are shown in Table 1 on the following page.

Table 1. Demographics of Participants in Evidence-Based Curriculum Implementation (N = 2,948)

Health District	Number of Youth	Race					Ethnicity			Gender			
		Black	White	American/ Native Pacific Islander	Other	Missing	Hispanic	Non- Hispanic	Missing	Male	Female	Other	Missing

South- (Valdosta) (District 8-1)	106	97	3	0	0	0	6	100	0	64	42	0	0
Southwest- (Albany) (District 8-2)	54	46	2	0	0	0	6	45	3	20	24	0	10
*Coastal (Savannah) (District 9-1)	0	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
TOTALS	2,948	1,172 (40%)	184 (6%)	5 (<1%)	0 (0%)	782 (27%)	805 (30%)	1,055 (36%)	1,088 (37%)	1,180 (40%)	1,205 (41%)	2 (<1%)	561 (19%)

*North (Gainesville) and Coastal (Savannah) districts were without a YDC throughout much of FY24 and therefore did not implement any EBCs

**Fulton County used modified sign-in sheets that reported aggregate attendance

As the data in the table indicates, race and ethnicity demographics were missing for a proportion of students. Among students with available race and ethnicity data, 40% identified as African American (Black), around 6% as White, 36% as non-Hispanic, and 30% as Hispanic. Gender demographics were more complete, though 19% lacked data. Among those with available data, participation was roughly equal by gender overall, but there were notable differences by health district, with Clayton and Lawrenceville showing higher female participation and DeKalb and Valdosta showing higher male participation.

Participants' knowledge related to unintended pregnancy and sexually transmitted diseases.

Students participating in evidence-based curricula training sessions completed surveys before (pre) and after (post) sessions to measure changes in knowledge on STD and pregnancy prevention. Response options included "True," "False," and "Don't know." A total of 278 matched pre- and post-surveys were

analyzed. Regarding curriculum participation, 33% reported participating in "Making Proud Choices," 30% in "Making a Difference," 25% in "Reducing the Risk," and the remainder either didn't know or selected "other." The results in Table 2 showed an increase in correct responses for each question from pre to post, with the largest gains seen for questions on whether a person who has previously had sex can choose to be abstinent and on using condoms as an effective STI prevention method.

Table 2. Knowledge Results for Individual 'STD and Pregnancy Prevention' Items on Matched

Items related to STDs & Pregnancy Prevention	Pre-Test Correct	Post-Test Correct	Change in Percentage Points
Q1. Using birth control (for example, a condom or a pill) can prevent pregnancy.	79%	83%	4
Q2. Abstinence (choosing not to have sex) is the only 100% effective way to prevent pregnancy and diseases/infections you can get from having sex.	77%	86%	9
Q3. A person who has had sex before can still be abstinent in the future.	58%	72%	14*
Q4. If you choose to have sex, using a condom is the best way to prevent diseases/infections you can get from having sex (STIs).	69%	81%	12*
Q5. If a person is having sex, they should not be tested for STIs.	79%	82%	3

*Indicates statistical significance at $p < 0.05$ or less

There was a statistically significant increase in the overall scores for knowledge-based items on pregnancy and STD prevention, rising from 72% on the pre-test to 81% on the post-test, representing a 9-percentage point improvement (see Table 3). Statistical significance indicates that the observed differences in average pre- and post-test scores are unlikely to be due to chance, with a standard significance level of 0.05 used for tests. This means there is a 5% probability that the improvements were due to random chance, suggesting the knowledge gains are a result of the program.

Table 3. Paired Samples Test (STD and Pregnancy Prevention Items)

	Overall Percent Correct Pre-Test	Overall Percent Correct Post-Test	One-sided p- value
Mean of items related to STDs & Pregnancy Prevention	72%	81%	<.001*

*Indicates statistical significance at $p < 0.05$ or less

Participant's confidence in maintaining healthy behaviors in relationships

Participants responded to statements related to healthy behaviors in relationships using "True," "False," and "Don't know" response options. As detailed in Table 4, six out of eight items showed increases in the percentage of correct responses from pre- to post- intervention. The largest gains were observed for Q3 (It is normal for victims of sexual violence to not talk about their abuse) and Q4 (It is ok to have sex with people who are drunk or high if they agree to have sex), both showing statistically significant improvements. Q6 and Q7 each improved by 10 percentage points; however, only Q6 showed a statistically significant difference.

Table 4. Knowledge Results for Individual 'Healthy Behavior' Items on Matched Surveys

Items related to Healthy Behaviors in Relationships	% Correct Pre-Test	% Correct Post-Test	Change in Percentage Points
Q1. It does not matter age, gender, or what someone looks like. Anyone could be a victim of sexual violence.	91%	87%	4
Q2. A person's "no" should be listened to, even if the other person wants to have sex.	92%	89%	3
Q3. It is normal for victims of sexual violence to not talk about their abuse.	60%	73%	13*
Q4. It is ok to have sex with people who are drunk or high if they agree to have sex.	68%	83%	15*
Q5. Stereotypes (or beliefs) about a group of people are often not true for all members of a group.	73%	77%	4
Q6. Embarrassing someone on purpose or calling them names can be signs of relationship abuse.	73%	83%	10*
Q7. It is harder to bully someone online than to bully someone in person.	49%	59%	10
Q8. Meeting up with someone in person who you have gotten to know online can be unsafe.	83%	85%	2

*Indicates statistical significance at $p < 0.05$ or less

As Table 5 shows, there was a statistically significant increase in the overall scores of the knowledge-based items pertaining to healthy behaviors in relationships, from 74% on the pre-test to 79% on the post-test (an increase of 5 percentage points).

Table 5. Paired Samples Test (Healthy Behavior Items)

	Overall Percent Correct Pre-Test	Overall Percent Correct Post-Test	One-sided p-value
Mean of items related to Healthy Behaviors in Relationships	74%	79%	<.001*

*Indicates statistical significance at $p < 0.05$ or less

Perception of factors that lead to a healthy future

To assess views about factors that will help youth become healthy and productive in the future, participants were asked about their abilities related to the outcomes listed in Table 6. Responses were recorded using a 4-point Likert scale where “1” represents “Strongly disagree” and “4” represents “Strongly agree.” Those who responded with “Strongly agree” and “Agree” are included. Although agreement was high for each item on the pre and post-tests, (ranging from 81% - 95%) seven of the ten items resulted in increases from pre to post.

Table 6. Perception of Factors Related to Becoming a Healthy, Productive Adolescent (N = 278)

Positive Outcome	% Agreement the Pre-Test	% Agreement the Post-Test	Change in Percentage points
1. I can do well in school.	94%	94%	0
2. I can get more education after high school.	87%	93%	6
3. I can get a steady job after high school.	94%	94%	0
4. I can make plans to reach my goals.	95%	95%	0
5. I can say no to friends who want me to do things that I don't want to do (peer pressure).	91%	94%	3
6. I can say no to using drugs and alcohol.	92%	94%	2
7. Live a healthy lifestyle (such as eating healthy and being active).	91%	94%	3
8. I can manage conflict.	85%	92%	7
9. I can talk about things that are important to me with a parent or trusted adult.	81%	88%	7
10. I can be careful with money by saving or making a budget.	86%	92%	6

Participants report of change in behaviors 3 months post-intervention

Behavior change evaluations are typically done 3-months after an intervention to allow time for behavior change to stabilize, an assessment of sustainability to take place, and time allotted for challenges or relapse in real-world context.

The behaviors listed in Table 7 were evaluated among a cohort of 36 students who completed pre-, post-, and three-month follow-up surveys after participating in risk-reduction curricula. The analysis focused on students with matched surveys across all three time points ($n = 26$). Demographically, this cohort was similar to the larger group of 278 students but with some differences, including a higher percentage of females (69%), more White students (27%), more Hispanic students (39%), and more students who did not identify as straight (19%).

Results showed that agreement with items related to healthy behaviors in relationships increased from post- to follow-up surveys. The percentage of students reporting risky behaviors in relationships decreased significantly from pre- to post-surveys, with a further slight decrease at follow-up. Very few students reported unsafe or coercive behaviors in relationships, and none reported pressuring or abusing partners at any point.

Regarding sexual behavior, none of the students reported engaging in intercourse pre- or post-intervention, with only two (8%) reporting intercourse at the follow-up. Both used protection to reduce their risk of unintended pregnancy and STIs. Neither reported non-consensual sex, pregnancy, or sex with an impaired partner. When asked about future sexual activity, only one student anticipated sexual activity within the next three months, and nearly all students expressed strong intent to use a method to protect from pregnancy if they did engage in sex. No students reported an STI diagnosis before, during, or after the intervention.

While positive trends were observed in healthy relationship behaviors three months post-participation, the small cohort size limited statistical significance testing, warranting cautious interpretation of these results.

Table 7. Behavior Results of Matched Pre, Post, and Follow-up Surveys (N = 26)

Behavioral Measure	% Agreeing on Pre	% Agreeing Post	% Agreeing Follow-up
1. (Since participating) Have you worked to have healthy, positive, relationships?	N/A	81%	100%
2. (Since participating) Have you talked with your parent or another trusted adult about how to have healthy, positive relationships?	N/A	39%	69%
2a. No, I have not talked to an adult about healthy relationships, but I still plan to	N/A	50%	23%
2b. No, I have not talked to an adult about healthy relationships, and I <i>do not</i> plan to	N/A	8%	8%
3. Are you or have you been in a relationship before? ⁹	65%	39%	50%
3a. Have you made a choice that hurt you in that relationship?	59%	20%	15%

3b. Have you made a choice that made you unsafe in that relationship	18%	0%	0%
3c. Have you pressured your partner to do things they did not want to do?	6%	0%	0%
3d. Have you pressured your partner to act a certain way?	0%	0%	0%
3e. Have you abused or hurt your partner?	0%	0%	0%
4. Have you had sex?	0%	0%	8%
4a. Have you had sex with your partner without his/her consent?	N/A	N/A	0%
4b. Have you been pregnant or gotten anyone else pregnant, to the best of your knowledge?	N/A	N/A	0%
4c. Have you had sex with a person who was not sober or awake	N/A	N/A	0%
5. Do you think you may have sex in the next 3 months?	4%	0%	4%
6. If I decide to have sex within the next 3 months, I will use a birth control method ¹⁰ .	100%	83%	90%
7. Have you been told by a doctor or nurse that you had a disease/ infection you can get from having sex, such as herpes, genital warts, gonorrhea, syphilis, or AIDS/HIV infection?	8%	8%	0%

⁹ Questions 3 and 7 were phrased slightly differently on the pre-survey as compared to the post and follow-up surveys. On the pre-survey, participants were asked if they had ever been in a relationship or been diagnosed with an STI/HIV, and on the post and follow-up surveys they were asked about these items in the context of “since participation, or within the last 3 months,” respectively

¹⁰ Students who indicated that they did not plan to have sex within the next 3 months were excluded from the denominator when calculating the percentage who agreed that they would use a birth control method.

Participants who avoided sexual intercourse post-participation and 3 months after participating in the program (26 and 24 participants, respectively) indicated the social factors that most frequently contributed to their decision not to engage in sex were a lack of interest, followed by fear of pregnancy, educational consequences, and participation in the evidence-based curriculum. Although percentages fluctuated between post and follow-up, the top four contributing factors for avoiding sexual intercourse did not change. See Figure 1 for the complete list of responses.

Figure 1: Factors Contributing to Participants Making the Decision Not to Engage in Sex 3 Months Post-Participation in Evidence-Based Curriculum (N = 26)

When asked what they liked about participating in the risk-reduction program or about ideas for improvement 3 months post-participation, several students indicated that they liked everything about the training. Students also indicated that learning about the subject matter, such as avoiding risky behaviors was helpful. It helped them better understand that those behaviors could lead to negative consequences. A few students mentioned that they liked the activities that involved student participation and getting to interact with other students. One student indicated that they liked the 3-month follow-up survey, stating “*It was a great survey.*”

Evaluation of Public Awareness Events

Surveys with a 5-point Likert scale where “1” represented “Strongly disagree” and “5” represented “Strongly agree” were used to measure perceived knowledge increase, satisfaction with implementation, willingness to attend future events, the likelihood of recommending the event to others, and willingness to engage in communication related to AHYD issues. See Table 10 below for percentages of youth who “Strongly agreed” or “Agreed” with items related to each measure.

Table 8. Selected Outcomes by Participants in Public Awareness Events

Measures	Effects of Drugs and Alcohol on the Body (N = 342)	Teen Pregnancy Prevention & STD/HIV Prevention (N = 284)	Maintaining Personal Hygiene during Puberty (N = 590)	Strategies for Preventing Bullying (N = 315)	Avoiding Teen Dating Violence through Healthy Relationships (N = 322)
Increased knowledge/awareness of topics covered in the Public Awareness Events	82%	74%	88%	85%	82%
Satisfaction with implementation	78%	73%	75%	73%	79%
Likelihood of participation in future events	65%	58%	60%	63%	64%
Would recommend event to others	66%	63%	57%	59%	70%
Confidence in communicating with other youth about the topic	78%	67%	79%	76%	78%

Conclusions

The DPH’s Chronic Disease Prevention Section’s Adolescent Health and Youth Development (AHYD) program continues to address critical health issues for Georgia youth by building supportive networks that encourage healthy behaviors and reduce teen pregnancy and HIV/STI rates. Pre- and post-implementation data from evidence-based curricula indicated a significant increase in knowledge related to pregnancy and STDs/HIV prevention, as well as a boost in confidence in maintaining healthy behaviors. Specifically, 46% of students improved their individual scores on pregnancy prevention and STD prevention knowledge, while 53% demonstrated improvements in healthy behavior. Follow-up surveys conducted three months post-program participation also showed positive trends in reported healthy behaviors.

Evaluation of Deliverable 3 indicated that over 74% of youth showed increased knowledge, 73% expressed satisfaction with public awareness events, and 67% felt confident sharing risk reduction information with peers on the event topics. Deliverable 4 evaluations demonstrated an increase in adolescent health knowledge and healthy behavior knowledge among youth-serving professionals who were surveyed before and after training.

Opportunity for Growth

The data demonstrates encouraging evidence of the AHYD program's success and highlights the potential for further impact with expanded resources. While OASIS data indicates an overall decline in pregnancy and STD rates among adolescents in Georgia over the past two decades, from 2015 to 2022, three health districts—West Central (Columbus) with a rate of 19.6 pregnancies per 100,000 youth, Southwest (Albany) at 19.4, and Clayton at 18.7—reported significantly higher rates than the statewide average of 14.2. Additionally, the Southwest (Albany), West Central (Columbus), and South (Valdosta) districts showed the highest STD rates among youth aged 10-19.

Given sufficient funding and opportunities for expansion, the AHYD program is optimistic about further reducing unintended pregnancy and STD rates among Georgia youth. The program also aims to enhance its reach by identifying and implementing evidence-based curricula specifically designed to engage youth with disabilities, ensuring broader program accessibility and impact.

DFCS Prevention and Community Support (PCS) Out of School Services (OSS)

Out of School Services (formerly the Afterschool Care Program) is located within the Georgia Division of Family and Children Services (DFCS), Prevention and Community Support (PCS) section and provides federal funding to non-profit organizations and public agencies who serve youth and families during the out-of-school time. It is designed to support DFCS' goal of providing resources and services that promote self-sufficiency among children and families. By funding services that are provided during before school, after school, intercession and summer hours, Out of School Services also supports two Temporary Assistance for Needy Families (TANF) goals:

- a) Reduce the dependency of needy parents by promoting job preparation, work, and marriage.
- b) Prevent and reduce unplanned pregnancies among single young adults.

The mission of Out of School Services is to provide resources to youth-serving organizations within the state of Georgia who serve families within low-to-moderate income communities and the foster care system. The vision of the Out of School Services Program is to ensure every child and youth has access to high quality youth development programming within their community. Educational attainment, positive youth development and an enhanced well-being are key factors in preventing future welfare dependency among today's youth, particularly youth of economically disadvantaged communities. Through out-of-school time programs, parents and caregivers can ensure their youth have a safe and enriching environment when the traditional school day ends. By providing funding through a Statement of Need (SON) solicitation process, Out of School Services partners with community-based organizations and public agencies throughout the state of Georgia that provide services to youth and their families. The goals of Out of School Services are to:

- Strengthen youth-serving organizations and institutions by providing funding that increases their capacity to design, implement, and sustain quality youth development programs and services.
- Provide opportunities for youth to establish positive relationships with their peers and caring adults during traditional non-school day hours; and
- Provide technical assistance to organizations and agencies as they implement services and activities that support their youth's overall well-being as they prepare for and transition into young adulthood.

Positive Youth Development Services

Agencies that are funded through the Out of School Services provide project-based learning activities and/or youth apprenticeship experiences to youth participants that support school day learning and encourage positive transitions into adulthood. Beginning in Federal Fiscal Year (FFY) 2016 through the conclusion of Federal Fiscal Year (FFY) 2021, funded agencies implemented STEAM (Science, Technology, Engineering, Arts and Math) based learning opportunities. Through project-based learning activities and apprenticeship-based experiences, youth had the opportunity to learn about 21st Century career and educational pathways that support our evolving workforce.

Project-based learning is a hands-on and creative approach to teaching, which provides academic support to students in a way that is fun and engaging. Projects are interdisciplinary in nature, build on student interest and provide students with an opportunity to demonstrate what they have learned through the completion of the project. The youth apprenticeship experience is a method of engaging youth in work-based skill development training that assists them in identifying and pursuing professional and career choices. Within organizations who implement apprenticeship experiences for youth, apprenticeships are taught by professionals with real-world experiences in the apprenticeship field selected by the program. Each of these programs also include opportunities for students to participate in

well-being support opportunities, including, but not limited to, health and well-being programming, and family and community engagement.

Out of School Services posted a new Statement of Need solicitation in Federal Fiscal Year (FFY) 2022 to encourage new youth serving organizations the opportunity to partner with the Division for a new funding cycle. To combat the lasting educational effects of the COVID-19 Pandemic, Out of School Services shifted the funding focus from Science, Technology, Engineering, Arts and/or Math (STEAM) to universal Academic Support. Academic Support can include tutoring, mentoring, literacy programming, youth development programming, project-based learning, youth apprenticeships or any activities that complement and reinforce the educational needs of the participating youth. This adjustment has allowed community-based organizations the flexibility to create specialized out-of-school time programming that speaks directly to the needs of the youth and families in their community. Out of School Services will post a new Statement of Need solicitation for Federal Fiscal Year (FFY) 2026.

Funding Allocation and MOE

Since Federal Fiscal Year (FFY) 2006, Out of School Services has partnered with agencies by providing funding to serve youth during the out-of-school time. Through this partnership, Out of School Services has required each partnering agency to provide a match contribution to support programs and services provided to youth. This match is used to support the Georgia Department of Human Services (DHS) and Georgia Division of Family and Children Services' (DFCS) Maintenance of Effort (MOE).

From Federal Fiscal Year (FFY) 2006 to Federal Fiscal Year (FFY) 2021, Out of School Services funding supported programs and services that served over 25,000 youth annually through after school and summer programs collectively (majority of the youth were served through the Georgia Alliance of Boys and Girls Clubs). As COVID – 19 descended upon our state during Federal Fiscal Year (FFY) 2020, funded out-of-school time programs remained committed to serving youth and their families by way of virtual engagement, socially distanced in-person programming, and expanded social supports (food boxes, student check ins, etc.) all proved to be instrumental in navigating life during the pandemic. Since Federal Fiscal Year (FFY) 2022 (Post Pandemic), many afterschool and summer programs are still grappling with lingering negative effects of the Pandemic and the push to expand high-quality programs has spurred innovation driven by youth needs and interests in Out of School Services funded programs. Each fiscal year, Out of School Services awards approximately \$15M to selected agencies with additional Maintenance of Effort (MOE) match support of approximately \$35M or more each year.

In Federal Fiscal Year (FFY) 2024, Out of School Services partnered with 28 agencies serving 255 sites in 72 counties throughout the state to provide positive youth development services during the out-of-school time. This resulted in approximately 30,130 eligible youth and 849 foster youth being served throughout our partnerships with community providers. As in previous programming years, the Georgia Alliance of Boys and Girls Clubs continues to serve the largest number of youth and provide the largest amount in match funding for the Department of Human Services and Georgia Division of Family and Children Services' MOE.

Partnerships and Collaborations

Since Federal Fiscal Year (FFY) 2013, Out of School Services has partnered with state agencies such as the Georgia Department of Education (GaDOE), Georgia Department of Public Health (DPH), Department of Early Care and Learning (DECAL) and other agencies under the Georgia Division of Family and Children Services (DFCS) to provide the Afterschool and Youth Development (ASYD) Conference where over 900 youth development workers, stakeholders and agency representatives attend each bi-annual hosting across the state. During the first ASYD Conference held in Federal Fiscal Year (FFY) 2013 with the partnership of the Georgia Division of Family and Children Services (DFCS),

the Georgia Afterschool and Youth Development Quality Standards were launched to continue the effort of improving quality and support to youth development and out-of-school time programs within our communities in Georgia. With state-wide partnerships to provide the ASYD Conference and upon initiating an effort to improve out-of-school time program quality standards; Out of School Services and our partnering agencies continue our commitment to provide programs and services that do not duplicate efforts throughout the state, instead complement and support the work of each agency while considering how initiatives, events, programs and services can be offered more streamlined and efficiently to benefit youth and families.

Future Goals and Program Impact

Out of School Services understands the importance of supporting organizations in their efforts to meet youth at their level of educational need. Out of School Services continues the support and implementation of the Afterschool and Youth Development (ASYD) Quality Standards usage statewide through all funded partners. Through a collective partnership with other state agencies, each funded program will have the opportunity to utilize the established ASYD Self-Assessment Tool to obtain baseline data of their program's quality and to create a plan of improvement to be implemented to address the needs of the "whole child" over the course of the contract year.

**E. The Number of Individuals Who
Received Diversionary Assistance in Order to
Prevent Their Requiring TANF Assistance
And the Categories and Cost of
Such Diversionary Assistance and
Job Acceptance and Retention Statistics**

Note: A diverted individual is defined as one who participates in Application Job Search and whose application for cash assistance is denied because the person either accepts a job or withdraws his or her application. No additional information is gathered on these individuals since they are no longer included in the TANF database.
