SENATE BILL 104 REPORTING REQUIREMENTS	ii
WELFARE REFORM IN GEORGIA, 2023	iii
SECTION A The Total TANF Caseload Count	2
SECTION B  Quarterly and Annual TANF Reports	3
SECTION C Percentage and Number of TANF Caseload Given Hardship Exemption from Lifetim	ne Limit 5
SECTION D  TANF Recipient Transportation Assistance	10
SECTION E Diversionary Assistance to Prevent TANF Receipt	14
SECTION F Number of Individuals Denied Assistance Due to a Serious Violent Felony Conviction	n 23
SECTION G Number of Mothers Under 19 Who Received TANF Assistance	24
SECTION H TANF Subsidized Child Care	28
SECTION I  Data on Teen Pregnancy Prevention	40
SECTION J Number of TANF Sanctions	* Information is not available
SECTION K  Number of Legal Immigrants Receiving TANF Benefits by Category of Immigration 8	Status 54
SECTION L  Number of Families No Longer Eligible Because of Time Limits	58
SECTION M Follow-up Information on Job Retention and Earnings	* Information is not available
SECTION N  Evaluation of the Effect of Code Section 49-4-186 On the Number of Births to TANF	Recipients Families 59

#### REPORTING REQUIREMENTS

### THE DEPARTMENT OF HUMAN RESOURCES IS SUPPLYING REPORTS AND STATISTICS ON WELFARE REFORM TO FULFILL THE REQUIREMENTS OF SENATE BILL 104.

#### FROM SENATE BILL 104:

"[The department shall] publish an annual report and such interim reports as may be necessary. The annual report and such interim reports shall be provided to the Governor and members of the General Assembly and contain the following:

- A. The total TANF caseload count:
- B. Quarterly and annual TANF reports, in full, prepared for submission to the federal government;
- C. The percentage of the TANF caseload and the number of individuals given a hardship exemption from the lifetime limit on cash assistance and a categorization for such exemption;
- D. The number of individuals who received transportation assistance and the cost of such assistance;
- E. The number of individuals who received diversionary assistance in order to prevent their requiring TANFassistance and the categories of such diversionary assistance, and job acceptance and retention statistics;
- F. The number of individuals denied assistance due to a serious violent felony conviction;
- G. The number of mothers under 19 years of age who received assistance and their percentage of the totalTANF caseload;
- H. Number of children receiving subsidized childcare and the total and average per recipient cost per child;
- I. Data on teen pregnancy prevention;
- J. The number of families sanctioned;
- K. The number of legal immigrants receiving TANF benefits by category of immigration status;
- L. The number of families no longer eligible because of time limits;
- M. Follow-up information onjob retention and earnings; and
- N. An evaluation of the effect of Code Section 49-4-186 on the number of births to TANF recipient families.

The annotations required under this paragraph shall be provided on a county-by-county basis where feasible.

#### **WELFARE REFORM IN GEORGIA: SFY 2013–2023**

#### Senate Bill 104

The enabling legislation for the Temporary Assistance for Needy Families (TANF) program in Georgia is Senate Bill 104, now known as Act 389. The major provisions are:

- Most recipients are limited to 48 months of TANF assistance.
- All adult TANF recipients and all eligible parents are required to participate in approved work activities.
- All adult TANF recipients are required to sign a personal responsibility plan that emphasizes personal responsibilities to better their lives.

Some of the required actions include:

- o ensuring that minor children attend school
- attending school conferences
- attending family planning counseling
- o participating in substance abuse treatment, if needed
- o having children immunized, and
- o obtain prenatal care, if needed
- Teen parents are required to continue to live with a parent or responsible relative and must remain in school to obtain their GED or high school diploma.
- Family cap measures were strengthened, so that TANF cash assistance does not increase for recipients who give birth to an additional child after receiving TANF for ten months.
- Families who do not meet work or personal responsibility requirements could be sanctioned, with a reduction in or termination of benefits for three (3) months or 12 months, depending on the number of infractions.

#### The Personal Responsibility and Work Opportunity Reconciliation Act

In August 1996, the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) was enacted. PRWORA eliminated the Aid to Families with Dependent Children (AFDC) cash entitlement program and replaced it with the TANF block grant. PRWORA effectively ended welfare entitlement, replacing the AFDC program with the time limited TANF program. The four purposes of TANF are:

- Provide assistance to needy families so that children may be cared for in their own homes.
- Reduce welfare dependency by promoting job preparation, work, and marriage.
- Prevent teen pregnancies.
- Encourage the formation and maintenance of two-parent families.

PRWORA established mandatory work participation rates and enacted time limits on the receipt of TANF benefits. Moreover, PRWORA afforded states greater flexibility in the design and implementation of the TANF program and provided each state a block grant to fund its program. State Maintenance of Effort (MOE) spending levels were mandated so that states would maintain levels of spending consistent with previous spending for AFDC.

In the fall of 1996, Georgia submitted a state plan for administering the TANF program. Following a 45-day federal review period and a series of public hearings, the plan was accepted by the U.S. Department of Health and Human Services (HHS) and Georgia was approved to receive the TANF block grant. The first TANF checks were issued on January 1, 1997.

In past years, the most important aspect of the case manager's job was issuing welfare benefits. With the 1996 introduction of Work First, the emphasis shifted to helping case managers assist TANF recipients in maintaining employment, as well as seeking career advancement. Customers are expected to find employment, keep the job, and seek career advancement. The goal is family self-sufficiency, limiting the need for public assistance. As a result, TANF caseloads greatly declined.

Georgia made the necessary changes to be compliant with the Final Rule. The most significant change was new internal control guidelines, requiring major system changes.

#### The Growth of TANF in Georgia

<u>October 2004:</u> Georgia initiated a new service delivery strategy for TANF called TANF = WORK NOW. This strategy focused on 3 elements:

- Education TANF participants were educated at the point of application on all the goals and requirements of the TANF program.
- Engagement TANF participants with a work requirement were engaged in work activities within seven (7) days of the approval of their application.
- Monitoring TANF participants were monitored consistently and frequently to ensure adherence to program requirements.

This concept yielded a significant decrease in the number of total TANF cases, particularly the number of adult mandatory cases.

**April 2006:** Georgia took TANF = WORK NOW a step further by focusing on values and beliefs that would assist in strengthening Georgia's families. New policies were implemented, and case managers were trained on the principles of case management. The values and beliefs that we espouse are:

- Welfare is not good enough for any family.
- Government cannot and should not take the place of family.
- Children are better off when responsible caretakers can provide for their families.
- There is dignity in work, whether with the hand or the head.
- Georgia urges responsible adult behavior and economic self-sufficiency to end dependency on government assistance.

• With proper preparation, support, and supervision, we can help our customers create a more secure employment future for themselves.

<u>October 2006:</u> Georgia recognized the need for additional transitional supports to assist participants with job retention and career advancement, thereby, launching the Work Support Program.

**February 2008:** Final Rule for the Reauthorization of TANF was released by the Administration for Children and Families (ACF) / HHS. This rule was based on changes required by the Deficit Reduction Act (DRA) of 2005. According to the DRA final document (45 CFR, Parts 261, 262, 263, and 265. pg. 6772), "The DRA reauthorized the TANF program through federal fiscal year (FFY) 2010 with a renewed focus on work, program integrity, and strengthening families through healthy marriage promotion and responsible fatherhood."

The DRA retained most of the original welfare reform law. The key changes in the Final Rule were: (1) defined each of the 12 countable work activities, (2) defined the term "work eligible individual," (3) clarified that a State may count only actual hours of participation, (4) recalibrated the caseload reduction credit by updating the base year from FFY 1995 to FFY 2005, (5) required each State to establish and maintain work participation verification procedures through a Work Verification Plan, (6) established a new penalty for failure to comply with work verification procedures, and (7) allows additional pro-family expenditures to count toward a State's MOE requirement.

<u>October 2010:</u> The agency rolled out a new business process, Georgia Re-engineering Our Work (G.R.O.W.). The G.R.O.W. process established three functions that case managers focus on (1) interviewing applicants, (2) processing applications, and (3) finalizing applications. An applicant in North Georgia applying for benefits could be interviewed by a case manager in Middle Georgia. The application could then be transmitted to a case manager in West Georgia for processing and transmitted to another location for finalization or approval. After approval, the case was transferred back to the county where the applicant resided. The G.R.O.W. process symbolized the concept of doing more with less.

<u>October 2011:</u> The Georgia Department of Human Services (DHS) added a new process, Document Imaging System (DIS). The DIS gave public assistance customers the option to scan in documents from a home computer scanner, a scanning station in a public community center, such as the Community Action Agencies/Authorities (CAA's), certain child support offices, or local Georgia Division of Family and Children's Services (DFCS) offices. Customers who were employed and unable to report to a local DFCS office could renew their benefits online and scan the required supporting documents to an image repository where the case manager or other staff could access the documents.

October 2012: DFCS revisited the G.R.O.W. process to reevaluate its effectiveness. During the evaluation, it became evident that the work could not change, but the way the work was done could. Business Operations Planning (B.O.P.) was added. B.O.P. is: (1) the standardization of G.R.O.W. within each Region. All Regions would use the same procedures to complete a case from start to finish. (2) Self-service was the standardized lobby resource, (3) Document Imaging (DIS), (4) Telecommunications – Local Office call center model, and (5) Office of Financial Independence (OFI) Data Tool – Standardized data management. OFI Teams were formed to

ensure standardization. The OFI Teams consisted of: (1) Customer Support, (2) Business Support, and (3) Eligibility Specialists. Our customer support staff supported all walk-in work and was the face of DFCS. The business support staff scanned mail to DIS, answered general inquiries, registered, and initiated cases. The eligibility specialists keyed cases, interviewed applicants, finalized cases, and handled case maintenance. With these measures in place, we were striving to provide our customers with a timely and efficient outcome.

**2013:** To improve the overall service of the public assistance programs, Georgia focused on improving the process to provide convenient access, service accountability, and improve the customer experience. Georgia One was a combination of technology (DIS and COMPASS) and incorporated self-service options that allowed DFCS to provide Supplemental Nutritional Assistance Program (SNAP), TANF, Childcare and Parent Services (CAPS), and Medicaid recipients the opportunity to track and manage their case. This change helped us serve our customers more efficiently and effectively.

<u>March 2015:</u> To find the best way to serve its people, the State reached out to all public assistance programs to map current processes. Georgia began to find more effective ways to help provide eligibility services and improve customer service. Georgia Gateway, an integrated eligibility system, began to form. It would allow interested parties to research information about available public assistance programs online. Future enhancements will include online application and eligibility criteria for other participating public assistance programs such as SNAP, CAPS, Medicaid, Women, Infants, Children (WIC), and PeachCare for Kids (PCK). Georgia Gateway is being implemented concurrently with a new business model known as "One Caseworker, One Family", which streamlines the case management process by assigning one caseworker from application to completion.

<u>February 2017:</u> Georgia Gateway, the multi-agency integrated eligibility system, debuted in Henry County. A phased rollout across the state culminated with Fulton and Dekalb counties joining in September 2017.

<u>October 2018:</u> Standardized Employment Services contracts, developed jointly by the state office and district staff, were put in place to simplify the delivery and monitoring of referred applicants and the activities of work-eligible individuals. Additional vendors were developed, along with a standardized invoicing system.

<u>2020:</u> The COVID-19 pandemic created the need to modernize TANF policies and procedures in 2020. Effective March 2020, mandatory work requirements were waived. However, those who were able and wished to continue their work activities remained supported. Also, eligibility verification requirements were lessened to remove potential hardships to those who were sheltering in place. For example, forms were mailed, but a signed copy was no longer required to be returned. Effective June 1, 2020 Temporary Assistance for Needy Families (TANF) became available via Georgia Gateway as an online application tool. Anyone may apply online Monday-Friday 5:00 am – midnight (excluding weekends and holidays).

<u>Work Activities and Sanction Suspension</u>: Since work requirements were temporarily waived, all outstanding work sanctions were lifted effective April 2020. Failure to participate will not result in adverse action until work requirements resume as mandatory.

<u>Extending Certification Periods on Renewals</u>: Reviews were also extended to assist families during the COVID pandemic. Families received a six-month extension on their annual renewal deadlines. For example, renewals that were due in March (pre-COVID-19) were extended to September.

**2021:** COVID-19 procedures for the TANF program that began in SFY 2020 remained in place during SFY 2021. This included temporarily waived work requirements, a reduction in the forms requiring client signature (to reduce the need for hard paperwork circulation) and extended renewal periods.

In SFY 2021, work-eligible individuals were encouraged to participate in work activities and support services continued to be paid. Many individuals benefited by choosing job search as a supported activity. Those participants who found full-time employment qualified for work support payments of \$200 per month for up to 12 months, as well as continued support services. State law requires a TANF lifetime limit of 48 months, however, Georgia granted good cause extensions to ensure that families' assistance remained in place when they needed it the most.

TANF policy was also adapted to mirror the evolving polices for SNAP and Medicaid. Having similar policies between programs streamlines eligibility practices for staff and reduces the need to provide non-essential verification, saving time and energy for our families requesting assistance.

<u>2022:</u> In SFY 2022, the TANF program saw the end of the COVID-19 Procedures that began in SFY 2020. This included the end of the Waiver of TANF Work Requirements. All work eligible individuals were to be assessed for work readiness and assigned an appropriate activity beginning July 2022.

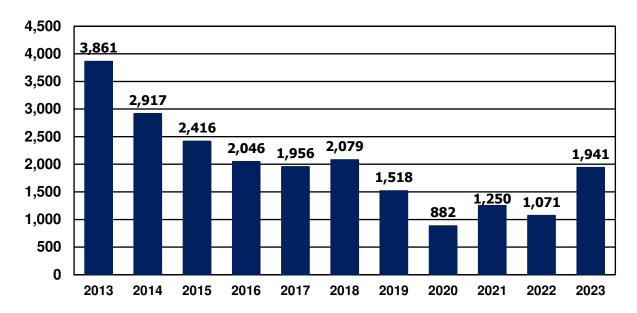

In April 2022, Georgia also distributed their Pandemic Emergency Assistance Funds (PEAF) established by the American Rescue Plan Act of 2021. P-TANF provided a one-time payment of \$775 per individual who had correctly received a TANF benefit between April 1, 2020, to September 30, 2021. This payment was to assist families with any financial needs arising from the pandemic. The remaining funds from the issuance of P-TANF were issued as an employment bonus to work eligible individuals who were employed when TANF work requirements resumed or gained employment in the month of July 2022 and the earned income caused TANF ineligibility effective August 1, 2022. The PEAF Employment Bonus amount was \$232.29 per family.

<u>2023</u>: With the signing into law of HB129 in SFY 2023, Georgia began expanding TANF eligibility to consider the needs of a pregnant woman. As of July 1, 2023, the TANF grant amount is now based on the number of eligible members and the number of verified fetuses. A pregnant woman or pregnant minor must meet all TANF eligibility requirements and are considered for work requirements with or without dependent children.

Additionally, HB129 brought an end to the provision for Family Cap in the TANF program. All TANF cases with a family cap child were updated prior to July 1 to remove the family cap provision which allowed some families to receive an increase in their TANF benefit for July ongoing.

#### **TANF Adult CASELOADS**

SFY 2013 - 2023

#### **TANF Adult Caseloads**

As we continue our mission to help TANF recipients attain self-sufficiency, our adult TANF caseload is decreasing. The TANF Adult Caseload has dropped from 3,861 in 2013 to 1,941 in 2023. The decrease is 1,920 cases within a 10-year period.

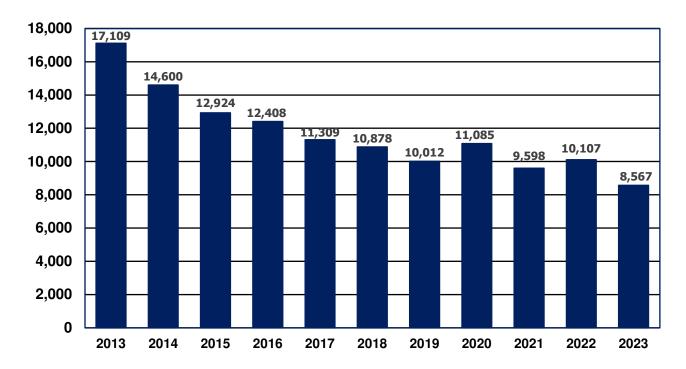

#### Collaborative Efforts

To assist Georgia's TANF recipients fulfill the requirements of Act 389 and attain self-sufficiency, it was necessary that we collaborate with other public service agencies and entities. To start, we formed partnerships with Georgia Department of Labor (GDOL) and the Technical College System of Georgia (TCSG) to develop a job-ready workforce. Each agency committed to providing specific services to TANF recipients, while DHS provided case management and support services. TCSG was the primary source for job training and GDOL focused on job development and placement.

The services provided through these partnerships have contributed greatly to the families receiving TANF. The recipients utilized the job training, job development and job placement resources from our partners to gain or refresh their skills; thus, becoming more marketable. The services also helped some find better jobs and leave the TANF program.

#### TANF CASELOADS

SFY 2013 - 2023

#### TANF Caseloads

In SFY 2013, Georgia had 17,109 TANF cases. The current total number of TANF cases in Georgia for SFY 2023 is 8,567. Georgia has reduced its caseload by approximately 50% in ten years.

#### **Transportation**

Transportation expenditures greatly increased with the implementation of TANF and subsequently decreased as the number of TANF cases declined. DFCS provides direct payments or public transportation cards to applicants, recipients, and those receiving transitional support. Beginning SFY 2000, DFCS collaborated with the Georgia Office of Facilities and Support Services to expand the Consolidated Transportation System. TANF funds invested in this initiative have increased from \$345,000 in SFY 2000 to \$3,200,000 in SFY 2018. Transportation services through DHS' Consolidated Transportation System ended in 2019 with a reduction in TANF cases. In SFY 2023, TANF funds paid directly to applicants and recipients totaled \$53,053.00.

#### **Employment Intervention Services (EIS)**

EIS is available to TANF applicants who have full time employment but is temporarily on unpaid leave due to a temporary illness and is scheduled to return to work within four (4) months, and the AU meets the gross income ceiling (GIC) test.

#### **Work Support Payments**

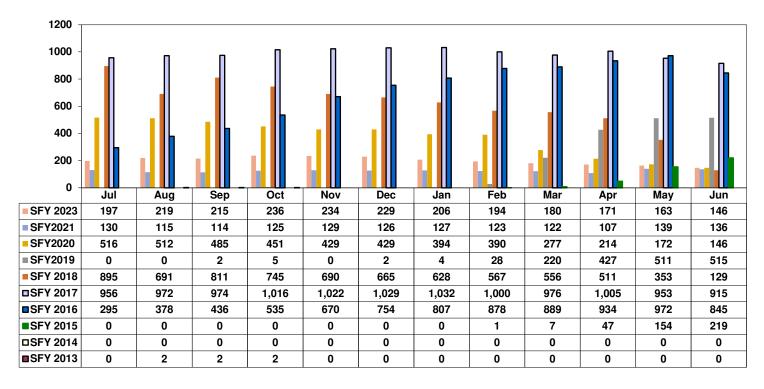

In addition to partnerships with other agencies, the availability of work support payments is critical to the success of TANF self-sufficiency efforts. To secure and maintain employment, many families require assistance with transportation, childcare, and medical expenses as well as assistance in obtaining child support.

WSP and Transitional Support Services (TSS) will be provided for applicants and participants who find employment and become ineligible for ongoing TANF or those who choose to close their TANF case once the benefit is reduced. Both services will be provided for up to twelve (12) months.

#### **TANF Subsidies**

Entitlement Code 98: Work Support Payments \$200 (Number of Clients)

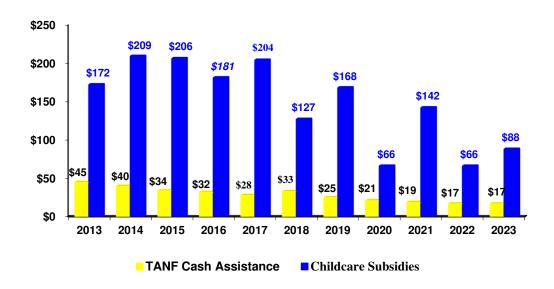

SFY 2013 - 2023

#### **Comparison of Cash Assistance and Childcare Expenditures**

(in Millions of Dollars)

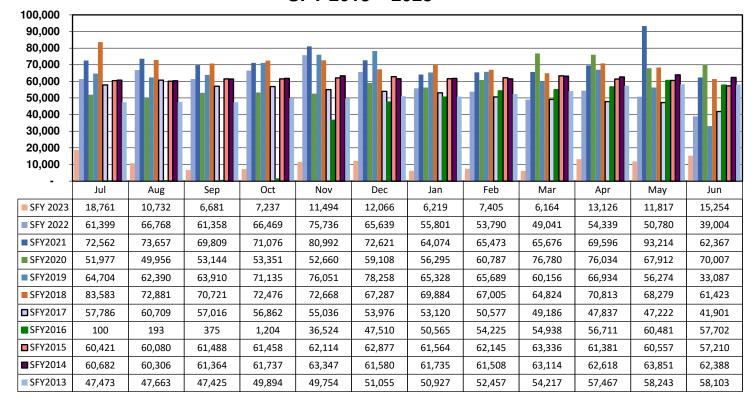

SFY 2013 - 2023

#### **Number of Children in Childcare**

(Based on payments processed)

SFY 2013 - 2023

#### Childcare

Affordable, quality childcare is essential to the success of individuals obtaining and maintaining employment. The average number of children in childcare from month to month decreased from 78,289 children in SFY 2010 to 33,087 in SFY 2019. In addition, expenditures in the program decreased from \$212M in SFY 2010 to \$88M in SFY 2023. Childcare assistance is administered by Georgia Department of Early Care and Learning.

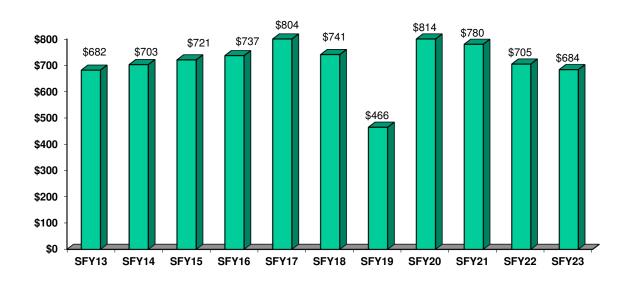

#### Medicaid

Many TANF recipients beginning first-time employment were either unable to afford the medical insurance made available to them by their employers or found that few employers offered the option of medical insurance. The combination of Low-Income Medicaid (LIM), Transitional Medical Assistance (TMA), and Right from the Start Medicaid (RSM) or PeachCare for Kids (PCK) provided and continues to provide this necessary coverage. The 12-month continuation of Medicaid in the form of TMA provides necessary medical coverage for families who become ineligible for LIM because of new or increased earned income. Once TMA ends, the children of most families are eligible for additional coverage through RSM or PCK. As of June of 2023, 1,430,218 Georgia families received Medical Assistance.

#### **Increasing Success in Collecting Child Support**

(Collections in Millions)

SFY 2013 - 2023

#### **Child Support**

Insufficient child support prevents many single parents from attaining economic self-sufficiency. Increased collections by the Division of Child Support Services (DCSS) program are helping families receive more of the child support owed to them. There was a drop in the amount of child support collected from SFY 2007 (\$651M) to SFY 2008 (\$566M). The collections rebounded in SFY 2009 (\$595M), in 2010 (\$600M), in 2011 (\$708M) and then slightly decreased in 2012 to (\$692M) and again in 2013 (\$682M). Child Support collections rebounded in 2014 to (\$703M), in 2015 to (\$721M), 2016 (\$737M), and 2017 (\$744M). Collections took a slight dip in SFY 2018 to (\$741M). In SFY 2019, there was a 37.1% decrease in collections. The total collected in SFY 2019 was \$466M. The total collected in SFY 2023 was \$684M.

An additional support service provided by DCSS is the Georgia Fatherhood Program, a statewide outreach program designed to increase the collection of child support from non-custodial parents with education and employment barriers. Job training is provided to assist non-custodial parents in securing employment that will enable them to pay child support and provide for their children.

#### **Collaborative Work Supports**

The future of welfare reform in Georgia includes a continuing focus on moving families to economic independence, through stable employment. Most recipients who remain on TANF fall into three main categories. The largest population is comprised of children who receive TANF in "child-only" cases, which a non-parent relative caring for the children and is not included in the TANF grant. These families are not subject to time limits or work requirements. The second category consists of recipients who are enrolled in an activity and participating at the required federally, mandated level for adults receiving TANF for themselves and their children. The third and most challenging category consists of recipients who are dealing with multiple barriers to self-sufficiency. Some of these barriers include substance abuse, illiteracy, disabilities, and domestic violence issues. The following initiatives continue to assist these recipients in attaining self-sufficiency:

- The Georgia Department of Behavioral Health & Developmental Disabilities (DBHDD) and Addictive Diseases provide substance abuse counseling and treatment through outpatient and residential facilities. Treatment for clients who have been diagnosed with mental impairment and mental retardation is also provided.
- The Georgia Vocational Rehabilitation Agency (GVRA) provides disability assessments for recipients who allege a disability that impedes their ability to work. GVRA also places recipients in appropriate programs based on assessment outcomes and makes recommendations that assist DFCS in planning services to help recipients overcome barriers to employment.
- The TCSG provides expanded adult literacy services and vocational classes.
- Domestic violence issues have been emphasized through various measures. Local shelters provide assessments for individuals claiming domestic violence as a barrier to becoming self-sufficient. Waivers from certain program requirements may be granted based on assessment outcomes. Training is provided for DFCS staff. Brochures and

posters are distributed throughout local areas to increase awareness of available services.

• In FY2018, Georgia partnered with the City of Atlanta and U.S. Department of Housing and Urban Development (HUD) to form the TANF Rapid Rehousing Program. Using a braided funding model, this partnership rapidly rehoused 100 homeless families living in location unsuitable for human habitation. Supportive services, including childcare navigation, employment assistance, and housing resources were provided. In FY2019 and ongoing, funds were added to house up to 150 TANF eligible families annually.

#### **Lifetime Limits**

In Georgia, the receipt of TANF is limited to 48 months in a lifetime for an assistance unit. Beginning in January 1997, each month of TANF receipt counts toward the 48-month lifetime limit. The federal lifetime limit is 60 months. An assistance unit that is subject to the lifetime limit may have the limit waived if it is determined that the assistance unit meets certain hardship criteria. TANF months received by a recipient from another State is subject to be counted in the lifetime time limits.

#### **Hardship waivers**

Some families will require additional time to prepare for work and some may never be fully self-sufficient. For these families, Georgia has established a hardship waiver policy that is approved on a case-by-case basis. The waiver of the lifetime limit allows for temporary extensions of TANF to families experiencing additional barriers.

The hardship waiver policy was revised in April 2006. There were three hardship criteria used by case managers to evaluate each family's situation.

Additional hardship criteria were added in February 2019 for individuals participating in substance abuse programs, physically and mentally unable to work, and caring for disabled household members.

- 1. The AU meets the domestic violence criteria.
- 2. The AU has an active child protective services case and the circumstances necessitating the CPS case create a barrier to the AU's attainment of self-sufficiency.
- 3. Participates in substance abuse program.
- 4. Physical/Mental incapacity to work.
- 5. Caring for a disabled household member
- 6. The disability of the grantee relative, other eligible adult or a household member is a barrier to employment for the grantee relative or other eligible adults.

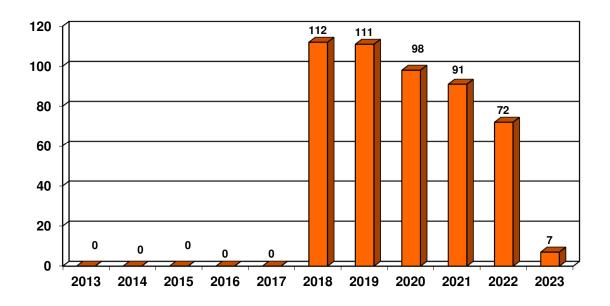

Other forms of support like Food Stamps, Medical Assistance, shelter, and utility assistance, are available to families that do not meet any of the hardship criteria.

Georgia's TANF caseload totaled 50,996 cases in December 2000 when the first 1,446 families reached the 48-month time limit. Of those families, 1,094 met a hardship criterion and were

eligible for extended TANF benefits through hardship waivers. Since December 2000, the number of families reaching the 48-month time limit has consistently decreased.

In December 2005, another milestone in the TANF program was reached. There were 311 Georgia TANF recipients that reached the federally imposed 60-month TANF lifetime limit. Of the 311 recipients, 280 continued to be eligible under a hardship extension. As with the 48-month time limit, the number of families reaching the 60-month federal lifetime limit has decreased. In June 2002, there were 1,566 families receiving a hardship extension, but in June 2005 there were only 230 families receiving extensions. In June of 2006, 49 families received an extension, and in June 2009, Georgia had only 18 families who received a hardship extension. In June 2010, there were only two households that received a hardship extension. In 2012, there was one household receiving a hardship extension. In 2013, there were no households receiving a hardship extension. As of 2023, there were 7 households receiving a hardship extension.

TANF Hardship Extensions
SFY 2013 – 2023

#### **Adolescent Health and Youth Development Program**

#### **Reporting on Fiscal Year 2023 Program Goals**

## Implementation of Evidence-based Curricula to reduce risk of pregnancy and HIV/STIs contraction.

Public health districts exceeded the stipulated annual goal of reaching 840 youth by reaching a total of 2,291 youth.

# Providing youth development opportunities to cover adolescent health topics and skill sets.

A total of 286 youth development opportunities were implemented during the fiscal year, exceeding the annual goal of 60.

#### Instituting public awareness events about adolescent health-related issues.

A total of 286 public awareness events were implemented throughout the public health districts, involving 43,270 attendees and exceeding the annual goal of 120 events.

# Providing training opportunities for youth-serving professionals, parents, community members, or youth.

A total of 1,087 youth-serving professionals were provided with training opportunities exceeding the annual goal of reaching 600 participants. In addition, 171 community members, 235 parents, and 223 youth were trained as part of this strategy.

#### **Evaluation of Program Activities**

During Fiscal Year 2023, the following program deliverables were evaluated to assess the impact of program activities:

- Implementation of Evidence-based Curricula to reduce risk of pregnancy and HIV/STIs contraction.
- Instituting public awareness events about adolescent health-related issues.

#### **Evaluation of the Implementation of Evidence-based Curricula**

#### **Demographics of program participants:**

The race, ethnicity, and gender of all youth participating in evidence-based curriculum in FY23 (N = 2,291) are shown in Table 1. As shown in the table, a good portion of the students (41.3%) did not indicate their race or ethnicity (36.2%). Among students who indicated their race, about 70% were African American (Black), about 20% were White and there were about 5% who reported to be Native American/Pacific Islander and an equal percentage of other races. Among those that indicated their ethnicity 46.2% were of Hispanic ethnicity and 54% indicated that they were non-Hispanic. Gender was more complete though still about 9.5% did not report their gender. Among those who reported their gender, about 54% were males and 46% were females.

Table 1. Demographics of Participants in Evidence-Based Curriculum Implementation (N = 2,291)

		Race			Ethnicity			Gender				
Health District	Number of Participants	Black	White	Native American/ Pacific Islander	Other	Missing	Hispanic	Non- Hispanic	Missing	Male	Female	Missing

TOTAL	2,291	940 (69.9%)	268 (19.9%)	69 (5.1%)	68 (5.0%)	946 (41.3%)	676 (46.3%)	785 (53/7%)	830 (36.2%)	1119 (54%)	954 (46%)	218 (9.5%)

Note to correct missing data – In FY24, standardized sign-in sheets will be used to capture demographic data consistently across all districts.

#### Participants' knowledge related to pregnancy and sexually transmitted diseases.

Students participating in the evidence-based curricula training sessions were surveyed before (pre) and after (post) the sessions to assess knowledge change. Among those students who had matched pre-post data from participating (n = 251), the average age was 14 (9<sup>th</sup> grade). Most students were male (54.2%), 44.2% were female, and 1.6% identified as gender fluid or non-binary. Over half of the students were Black or African American (55.0%), followed by Multiracial (21.9%), White (18.3%), American Indian or Alaska Native (2.8%), and Asian (1.2%). Nearly 30% of students were Hispanic.

Survey Participants were asked to respond to the statements on STD and pregnancy prevention. Response options were "yes," "no," and "don't know." As shown in Table 2, there was a

statistically significant increase in the overall scores of the knowledge-based items about pregnancy and STD prevention, from 60% on the pre-test to 77% on the post-test, (an increase of 17 percentage points).

 Table 2.
 Paired Samples Test (STD and Pregnancy Prevention Items)

	Overall Percent Correct Pre-Test	Overall Percent Correct Post-Test	One- sided p-value
Mean of items related to STDs & Pregnancy Prevention	60%	77%	<.001*

<sup>\*</sup>Indicates statistical significance at p < 0.05 or less

Statistical significance is important because it indicates the probability that observed differences between two averages – in this case, the average pre- and post-test scores – are not likely to be due to chance. All tests of significance were conducted at the standard 0.05-level indicating there is only a 5% probability that the observed differences are due to random chance. In other words, the knowledge gained from the pre-test to the post-test is likely due to the program and not random chance.

In addition, as displayed in Table 3, increases were seen for each question from pre to post, with the highest increases shown for Q2 (*Abstinence is the only 100% effective protection from pregnancy, STIs, and HIV/AIDs*), and Q3 (*A person who has had sex should not practice abstinence anymore*). All six knowledge-based items (100%) pertaining to STDs and pregnancy prevention items showed significant gains, measured pre- and post-intervention.

Table 3. Knowledge Results for Individual 'STD and Pregnancy Prevention' Items on Matched Surveys

Items related to STDs & Pregnancy Prevention	Pre-Test Percent Correct (N = 251)	Post-Test Percent Correct (N = 251)	Change in Percentage Points
Q1. Using birth control prevents pregnancy	71%	83%	12
Q2. Abstinence (choosing not to have sex) is the only 100% effective protection from pregnancy, STIs, and HIV/AIDs	70%	88%	18
Q3. A person who has had sex should not practice abstinence anymore	47%	72%	24

Q4. Condoms are the best way to prevent sexually transmitted diseases	69%	79%	10
Q5. If a person is having sex, they should not be tested for STIs	71%	82%	11
Q6. It is important to use condoms sometimes during vaginal and anal sex	32%	55%	23

#### Participant's confidence in maintaining healthy behaviors in relationships.

Participants were asked to respond to statements about healthy behaviors in relationships. Response options were "yes," "no," and "don't know." As Table 4 shows, there was a statistically significant increase in the overall scores of the knowledge-based items about healthy behaviors in relationships, from 71% on the pre-test to 82% on the post-test (an increase of 11 percentage points).

Table 4. Paired Samples Test (Healthy Behavior Items)

	Overall Percent Correct Pre-Test	Overall Percent Correct Post- Test	One- sided p-value
Mean of items related to Healthy Behaviors in Relationships	71%	82%	<.001*

<sup>\*</sup>Indicates statistical significance at p < 0.05 or less

Table 5 shows changes from pre- to post for each question. Increases were seen in all questions with the highest increases shown in Q1 (*One partner must exert power and control for a relationship to be healthy*), Q5 (*It is normal for victims of sexual violence not to talk about their abuse*), and Q12 (*It is okay to have sex with people who are drunk if they agree to have sex*). There were significant gains on 10 of the 13 knowledge-based items about healthy behaviors in relationships, measured pre- and post-intervention.

Table 5. Knowledge Results for Individual 'Healthy Behavior' Items on Matched Surveys

Items related to Healthy Behaviors in Relationships	Pre-Test Percent Correct (N = 251)	Post-Test Percent Correct (N = 251)	Change in Percentage Points
Q1. One partner must exert power and control for a relationship to be healthy	64%	84%	19.5

Q2. Regardless of age, gender or appearance, anyone could be a victim of sexual violence	85%	91%	6.4
Q3. A person's "no" should be respected, even if the other person wants to have sex	87%	92%	5.2
Q4. Partners in a relationship should not treat each other as equals	75%	82%	7.2
Q5. It is normal for victims of sexual violence not to talk about their abuse	56%	70%	13.5
Q6. It is more difficult to bully someone online than to bully someone in person	46%	59%	12.7
Q7. Stereotypes or expectations about an entire group of people are often not true for all members of a group	66%	76%	9.6
Q8. If a guy gets hurt or starts to cry, it means that he is not tough	76%	89%	12.7
Q9. Girls should not be decision-makers in a relationship	64%	71%	7.6
Q10. Humiliation, name-calling, and putting the other person down are signs of an abusive relationship	76%	86%	10.0
Q11. Communicating wants and needs with a partner is important for a healthy relationship	84%	90%	6.0
Q12. It is okay to have sex with people who are drunk if they agree to have sex	62%	86%	24.3
Q13. Making the decision to meet someone in person after you have developed a relationship with them online can be risky	81%	87%	6.0

#### **Evaluation of Public Awareness Events**

Table 6 shows the percentage of youth that indicated increased knowledge, satisfaction, and confidence in sharing information with other youth on the topics covered in the public awareness events. In general, participants expressed heightened knowledge and awareness across all subjects. It's important to highlight that ratings for participation in future events and recommendations to others were lower than anticipated. The program should consider the evolving nature of events, as participants demonstrated increased understanding, suggesting that the information may need to be delivered differently.

Table 6. Selected Outcomes by Participants in Public Awareness Events

Public Awareness Event Topics										
	Effects of Drugs and Alcohol on the Body (N = 910)	Teen Pregnancy Prevention &STD/HIV Prevention (N = 175)	Maintaining Personal Hygiene during Puberty (N = 334)	Strategies for Preventing Bullying (N = 1,372)	Avoiding Teen Dating Violence through Healthy Relationships (N = 698)					
Percent of participants that indicated increased knowledge/awareness of topics covered in the Public Awareness Events	86%	80%	84%	77%	82%					
Percent of participants that indicated satisfaction with implementation	70%	67%	78%	59%	67%					
Percent of participants that will participate in future events	52%	55%	69%	42%	51%					
Percent of participants that would recommend to others	61%	64%	72%	51%	62%					
Percent of participants that indicated confidence in communicating with other youth about the topic	73%	63%	78%	69%	72%					

#### **Conclusions**

The Georgia Department of Public Health AHYD program continues to address AHYD health-related issues and actively tries to create supportive networks that encourage Georgia youth to adopt healthy lifestyles and reduce the incidence of teen pregnancy & HIV/STI contraction. The results of the pre-post data collected before and after the implementation of evidence-based curricula, among youth with matching pre-post data, revealed that there was a significant increase in the overall pre and post-test scores in knowledge related to pregnancy and STDs/HIV prevention, and a significant increase in confidence in maintaining healthy behaviors. Further,

there were significant gains on all six items relating to pregnancy and STD prevention, and on all 13 items related to healthy behaviors. In addition, overall pre-test scores increased from 60% correct to 77% correct on the post-test for the STD and pregnancy prevention items, and from 71% correct to 82% correct on the items related to healthy behaviors in relationships. An evaluation of Strategy 3 showed that youth indicated increased knowledge (77% or more of youth), confidence in sharing information with other youth on the topics covered in the public awareness events (63% or more of youth), and satisfaction with the events (59% or more of youth).

#### **Opportunity for Growth**

The data is encouraging and indicates evidence of the success of the AHYD program. The program hopes to secure additional funds to build on its current successes by expanding programming to reach a larger population. Although pregnancy and STD rates have declined overall in Georgia over the past 2 decades, during the years 2000-2021, the West Central (Columbus) Health District, the Southwest (Albany) Health District, and the Southeast (Waycross) Health District had 34.6, 33.9, and 33.6 rates of pregnancy per 100,000 youth, respectively. West Central (Columbus) and Southwest (Albany) Health Districts also have the highest STD rates among the population aged 10 – 19. Given the opportunity for expansion and appropriate funding, the AHYD program is confident the rates of unintended pregnancies and STDs can be reduced further.

#### **DFCS Out of School Services Program**

The Out of School Services Program (formerly the Afterschool Care Program) is located within the Georgia Division of Family and Children Services (DFCS) and provides federal funding to non- profit organizations and public agencies who serve youth and families during the out-of-school time. It is designed to support DFCS' goal of providing resources and services that promote self- sufficiency among children and families. By funding services that are provided during before school, after school, intercession and summer hours, the Out of School Services Program also supports two Temporary Assistance for Needy Families (TANF) goals:

- a) Reduce the dependency of needy parents by promoting job preparation, work, and marriage.
- b) Prevent and reduce unplanned pregnancies among single young adults.

The mission of the Out of School Services Program is to provide resources to youth-serving organizations within the state of Georgia who serve families within low-to-moderate income communities and the foster care system. The vision of the Out of School Services Program is to ensure every child and youth has access to high quality youth development programming within their community. Educational attainment, positive youth development and an enhanced well-being are key factors in preventing future welfare dependency among today's youth, particularly youth of economically disadvantaged communities. Through out-of-school time programs, parents and caregivers can ensure their youth have a safe and enriching environment when the traditional school day ends. By providing funding through a Statement of Need (SON) solicitation process, the Out of School Services Program partners with community-based organizations and public agencies throughout the state of Georgia who provide services to youth and their families. The goals of the DFCS Out of School Services Program are to:

- Strengthen youth-serving organizations and institutions by providing funding that increases their capacity to design, implement, and sustain quality youth development programs and services;
- Provide opportunities for youth to establish positive relationships with their peers and caring adults during traditional non-school day hours; and
- Provide technical assistance to organizations and agencies as they implement services and activities that support their youth's overall well-being as they prepare for and transition into young adulthood.

#### **Positive Youth Development Services**

Agencies that are funded through the DFCS Out of School Services Program provide project-based learning activities and/or youth apprenticeship experiences to youth participants that support school day learning and encourage positive transitions into adulthood. Starting in Federal Fiscal Year (FFY) 2016 and going through the conclusion of Federal Fiscal Year (FFY) 2021, funded agencies implemented STEAM (Science, Technology, Engineering, Arts and Math) based learning opportunities. Through project-based learning activities and apprenticeship-based experiences, youth had the opportunity to learn about 21<sup>st</sup> century career and educational pathways that support our evolving workforce.

Project-based learning is a hands-on and creative approach to teaching, which provides academic support to students in a way that is fun and engaging. Projects are interdisciplinary in nature, build on student interest and provide students with an opportunity to demonstrate what they have learned through the completion of the project. The youth apprenticeship experience is a method of engaging youth in work-based skill development training that assists them in identifying and pursuing professional and career choices. Within organizations who implement apprenticeship experiences for youth, apprenticeships are taught by professionals with real-world experiences in the apprenticeship field selected by the program. Each of these programs also include opportunities for students to participate in well-being support opportunities, including, but not limited to, health and well-being programming, and family and community engagement.

The Out of School Services Program posted a new Statement of Need solicitation for Federal Fiscal Year 2022 to encourage new youth serving organizations the opportunity to partner with the Division and the Out of School Services Program for a new funding cycle. In an effort to combat the lasting educational effects of the COVID-19 Pandemic, the Out of School Services Program shifted the funding focus from Science, Technology, Engineering, Arts and/or Math (STEAM) to universal Academic Support. Academic support can include tutoring, mentoring, literacy programming, youth development programming, project-based learning, youth apprenticeships or any activities that complement and reinforce the educational needs of the participating youth. This adjustment allows community-based organizations the flexibility to create specialized out-of-school time programming that speaks directly to the needs of the youth and families in their community.

#### **Funding Allocation and MOE**

Since Federal Fiscal Year (FFY) 2006, the DFCS Out of School Services Program has partnered with agencies by providing funding to serve youth during the out-of-school time. Through this partnership, the Out of School Services Program has required each partnering agency to provide a match contribution to support programs and services provided to youth. This match is used to support the Georgia Department of Human Services (DHS) and Georgia Division of Family and Children Services' (DFCS) Maintenance of Effort (MOE).

From FFY 2006 to FFY 2021, the Out of School Services Program funding supported programs and services that served over 25,000 youth annually through after school and summer programs collectively (majority of youth were served through the Georgia Alliance of Boys and Girls Clubs). As COVID – 19 descended upon our state during FFY 2020, funded Afterschool programs remained committed to serving youth and their families by way of virtual engagement, socially distanced in-person programming, and expanded social supports (food boxes, student check ins, etc.) all proved to be instrumental in navigating life during the pandemic. Since FFY 2022 (Post Pandemic), many afterschool and summer programs are still grappling with lingering negative effects of the Pandemic and the push to expand high-quality programs has spurred innovation driven by youth needs and interests in the Out of School Services Program funded programs. Each fiscal year, the DFCS Out of School Services Program awards approximately \$15M to selected agencies with additional Maintenance of Effort (MOE) match support of approximately \$35M or more each year.

In FFY 2023, the Out of School Services Program partnered with 31 agencies to provide positive youth development services during the out-of-school time. This resulted in approximately 32,115 eligible youth being served throughout our partnerships with community providers. As in previous programming years, the Georgia Alliance of Boys and Girls Clubs continues to serve the largest number of youth and providing the largest amount in match funding for the Department of Human Services and Georgia Division of Family and Children Services' MOE.

#### **Partnerships and Collaborations**

During FFY 2013, the Out of School Services Program partnered with other state agencies to provide the first Afterschool and Youth Development (ASYD) Conference in Georgia. In FFY 2014, in partnership with the Governor's Office for Children and Families (GOCF), Georgia Department of Education (GaDOE), and Georgia Department of Public Health (DPH), the Georgia Division of Family and Children Services provided the second statewide After School and Youth Development (ASYD) Conference. The conference was held in Augusta, Georgia and over 900 youth development workers, stakeholders and agency representatives attended. During the ASYD Conference, the Georgia Afterschool and Youth Development Quality Standards were launched to continue the effort of improving quality and support to youth development and out-of-school time programs within our communities in Georgia. The ASYD Conference was held again in FFY 2016, FFY 2018 and virtually in FFY 2021. An in-person ASYD Conference was held September 7-9, 2022, in Athens, GA and was an opportunity to reconnect with youth development professionals across the state to share best practices, tools and tips on being successful in our service to youth and to highlight stellar leaders and organizations within our field. With the statewide partnership to provide the ASYD Conference and in initiating an effort to improve out-of-school time program quality through state after school quality standards, DHS, DFCS, GaDOE and DPH have continued their commitment in working to provide programs and services that do not duplicate efforts throughout the state of Georgia but complement and support the work of each agency while considering how initiatives, events, programs and services can be offered more streamlined and efficiently.

#### **Future Goals and Program Impact**

The Out of School Services Program understands the importance of reducing the negative effects of COVID-19 on Georgia's youth and has made the necessary adjustments to support organizations in their efforts to meet youth at their level of educational need. The Out of School Services Program also continues the support and implementation of the Afterschool and Youth Development (ASYD) Quality Standards usage statewide through all funded partners. Through a collective partnership with other state agencies, each funded program will have the opportunity to utilize the established ASYD Self-Assessment Tool to obtain baseline data of their program's quality and to create a plan of improvement to be implemented over the course of the contract year.

E. The Number of Individuals Who
Received Diversionary
Assistance in Order to Prevent
Their Requiring TANF
Assistance
And
The Categories and Cost of
Such Diversionary Assistance
and Job Acceptance and
Retention Statistics

**Note:** A diverted individual is defined as one who participates in Application Job Search and whose application for cash assistance is denied because the person either accepts a job or withdraws his or her application. No additional information is gathered on these individuals since they are no longer included in the TANF database.
